---

Full Stack Web Developer specialized in backend, with extensive experience in creating scalable and responsive software for servers and devices in local environments. I have developed web applications and solutions for microcontrollers and microcomputers, managing to deploy and maintain numerous sites and applications. In addition, I have actively collaborated in multidisciplinary projects, contributing significantly to the architecture and the integral operation of each initiative.

## PROFESSIONAL EXPERIENCE

---

### EZPASS

**Valencia, Venezuela**

*April 2023 – Present*

Web platform and microcomputer network for accounting management and access control in housing developments and clubs, acting as Full Stack and Microcontroller Developer.

- **Web Application:** Development in [ezpass.cloud](http://ezpass.cloud) with Laravel, Blade, JavaScript, Bootstrap and MySQL (MVC pattern) and full UX/UI implementation.
- **Deployment and APIs:** Integration and deployment of the platform with APIs for communication with microcomputers, using AWS services for scalability.
- **Microcomputer Software:** Python programming on Debian OS with OpenCV and development of a synchronization system between local and cloud databases to operate without continuous connection.

### COLEGIO DE ABOGADOS DEL ESTADO CARABOBO

**Valencia, Venezuela**

*July 2022 – Present*

As a Programming Analyst, faced challenges in data analysis, system integration and web support.

- Data analysis was performed in Microsoft SQL Server.
- Creation of a program for membership cards using Python.
- Development of a web site for billing queries ([coleabg.com](http://coleabg.com)).
- Implementation of Python scripts and APIs to integrate the billing and parking systems.

### ALCALDÍA DE NAGUANAGUA

**Valencia, Venezuela**

*April 2021 – July 2021*

Internship in the IT department to meet the requirements to complete the PC Operator course at the Don Bosco Training Center, where I performed technical support tasks for the organization's computers, installation and maintenance of communication networks and administration of the database hosted on the main server.

## FINANCY

**Valencia, Venezuela**

*March 2025 – April 2025*

Participation as a Full Stack developer. ([financy-main-sprvyq.laravel.cloud](https://financy-main-sprvyq.laravel.cloud)).

- I implemented a modern architecture that integrated React and Inertia.js on the frontend with Laravel on the backend.
- I applied Tailwind CSS to achieve a responsive and optimized design.
- I designed a robust MySQL framework for efficient financial data management.

## SOULBEAT

**Valencia, Venezuela**

*August 2024 – January 2025*

Backend developer ([soulbeat-main-aycgt.h.laravel.cloud/login](https://soulbeat-main-aycgt.h.laravel.cloud/login)).

- I was in charge of the MySQL database design, developing migrations, models and controllers under the MVC model with Laravel.
- I developed essential functionalities, such as the real-time messaging module using Pusher and sockets.
- I worked in a collaborative environment based on Extreme Programming (XP) methodology.

## BISTROT CHEF REMY SYSTEM

**Valencia, Venezuela**

*April 2024 – August 2024*

Backend developer ([github.com/angelopol/bistrot](https://github.com/angelopol/bistrot)).

- Implemented the user authentication system, designed the templates (Administrators, Employees).
- Established templates for the creation of routes and controllers.
- Coordinated the integration of modules and the development of joint functionalities between backend and frontend using Scrum methodology.

## EDUCATION

---

### UNIVERSIDAD JOSÉ ANTONIO PÁEZ

**San Diego, Venezuela**

Computer Engineering

*October 2022 - Present*

- 7th semester in progress.

## SKILLS

---

- Techniques: Laravel – Blade - Composer (PHP), React - NodeJs - Express (Javascript), Bootstrap - Tailwind (HTML - CSS), C++, Python, SQL, Docker, Nginx, AWS, Debian (Linux), Arduino, ESP32, Git.
- Soft skills: Teamwork, leadership, problem solving and effective communication. I am adaptable, proactive and a quick learner, with a focus on process optimization, time management and meeting objectives.
- Languages: Native spanish, english.
